EDUCATION

Massachusetts Institute of Technology

Cambridge, MA

Bachelor of Science in Computer Science and Engineering

Aug. 2024 – Expected May 2028

- GPA: 5.0/5.0
- Relevant coursework: Graduate Machine Learning, Deep Learning, Natural Language Processing, Operating Systems, Computer Vision, Software Performance Engineering, Secure Hardware Design, Advanced Algorithms

Marquette High School

St. Louis, MO

High School Diploma

Aug 2020 – May 2024

EXPERIENCE

Software Developer

May 2026 – Aug 2026

Jane Street

New York City, NY

- Designed and integrated a highly configurable onsite scheduling platform to replace a rigid legacy workflow for the recruiting team
- Streamlined operations by introducing customizable defaults and savable templates, reducing manual configuration time

Machine Learning Engineer

Oct 2025 – Jan 2026

Wine Find

Remote

- Implemented a wine recommendation system using semantic embeddings for personalized user suggestions.
- Deployed an Instagram style sharing and friends system from scratch, including public/private account logic and notifications.

Learning Assistant

Aug 2025 – Dec 2025

6.191 Computational Structures, MIT

Cambridge, MA

- Mentored 100+ students in designing and debugging complex digital systems, including RISC-V processor architectures, memory hierarchies, and pipelining logic.
- Facilitated weekly office hours to explain core concepts in MiniSpec, CMOS logic, and hardware-software interfaces, helping optimize designs for timing and area constraints.

Software Engineer

Jun 2025 – Aug 2025

Citadel Securities

New York City, NY

- Profiled and optimized critical execution processing fast paths for multiple exchanges, improving the fast path by 60% and reducing cache misses by over 75%.
- Developed a C++ API for performance monitoring and integrated it into 4 existing use cases for the low-latency team.

Women in Trading and Technology Intern

Jan 2025

Hudson River Trading

New York City, NY

- Developed a high-frequency trading algorithm for the Brazilian trading market, trading over \$800k notional and 200k shares over 4 days, conducting research on trading patterns and strategies to identify profitable opportunities in fast-paced environments.
- Implemented market orderbook in C++ to translate raw data streams into viewable information and process transactions, achieving a 25% speedup against general implementations

HONORS AND AWARDS

Gold medalist, 13th overall at **European Girls' Olympiad in Informatics (2023)** representing the USA
2x **USA Computing Olympiad (USACO)** Finalist (2023, 2024); USACO Platinum Division (2022); USACO coach and problem setter (2024)

TECHNICAL SKILLS

Languages: C++, Python, HTML, CSS, JavaScript, Typescript, SQL, OCaml

Frameworks: React, Node.js, Next.js, Tailwind, Knex, Supabase
